PROJECTS DONE

Tic-Tac-Toe Game using HTML, CSS ,Java script.
Project Description : A web-based Tic Tac Toe game built with HTML, CSS, and JavaScript, allowing two players to take turns marking X and O on a 3x3 grid. The game features win detection, reset functionality, and a clean, responsive user interface.

Analog Digital Watch using HTML, CSS ,Java script.
Project Description : This code creates a simple web-based watch with both an analog clock (using rotating hands) and a digital clock (displaying the current time), updated every second using HTML, CSS, and JavaScript.

Water Land Project using HTML, CSS, Java script.
Project Description : The "Water Land Project" is an interactive web-based simulation that visualizes water flow or terrain features using HTML, CSS, and JavaScript, often incorporating animations or dynamic elements.

Responsive Personal Portfolio using HTML, CSS, Java script.
Project Description : A responsive personal portfolio built with HTML, CSS, and JavaScript to showcase skills, projects, and contact details. The site features a mobile-friendly design and interactive elements for an engaging user experience.
